

The M.Sc. in Early Childhood Research at Leipzig University (Germany) is a **two-year Master's program** fully conducted in **English**.

The program aims to enable highly qualified students to build up a career as a researcher as well as a scientific coordinator, consultant or advisor in the interdisciplinary field of early child development.

The program comprises **120 credits (4 semesters)** and a curriculum reflecting a wide range of topics including: cognitive and social development, psychopathological development, cultural variability of child development, comparative development across species and developmental cognitive neuroscience. Students will also be trained in basic and complex statistics, the use of the statistics software package R and relevant soft skills such as project management, science communication as well as teaching and supervision. With a strong focus on the research aspects of early child development, the program offers the opportunity to conduct early childhood studies in a number of research labs throughout Leipzig such as the Leipzig Research Center for Early Child Development, the Max Planck Institute for Evolutionary Anthropology and the Max Planck Institute for Human Cognitive and Brain Sciences.

Admission requirements

- Bachelor's degree (or equivalent)
 - Excellent English skills (at least C1 Level (CEFR) or equivalent)
- For a complete list of the required documents see:
www.lfe.uni-leipzig.de/en/studying/how-to-apply/

Application

For applicants who obtained a degree from a German university, the **application period** runs from **May 1 to May 31, 2018** (for admission in October 2018). Please apply through: AlmaWeb – <https://almaweb.uni-leipzig.de>

For applicants holding a degree from a university/college abroad, the **application period** runs from **April 1 to May 31, 2018** (for admission in October 2018). Please apply through: www.uni-assist.de

UNIVERSITÄT
LEIPZIG

M.Sc. Early Childhood Research

New International Master's Program
at the Faculty of Education

semester 4

M11

Teaching and Supervising in Higher Education

Acquiring the necessary skills to teach and supervise university students

M12

Research Colloquium II

Discussing research findings with peers and lecturers

M13

Perspectives on Early Child Development in Research and Application

Discovering different potential career options for early childhood researchers

semester 3

M8

Early Child Development in Interdisciplinary Context

Learning to integrate theories of child development from various disciplines such as philosophy or anthropology

M9

Research Colloquium I

Discussing research designs with peers and lecturers

M10

Scientific Practice II

Learning how to manage research projects and how to communicate research findings amongst scientists and to the general public

M3

Developmental Psychopathology in Early Childhood

Learning about psychological disorders in early childhood, diagnostic tools and intervention practices

semester 2

M5

Early Child Development II

Assessing current empirical findings about child development from evolutionary, anthropological and neuroscience perspectives

M6

Research Internship

Gaining first-hand experience during a 6-week research internship

M7

Empirical Methods in Early Childhood Research II

Implementing a complex research design and learning to analyze more complex datasets

semester 1

M1

Early Child Development I

Getting to know theories of child development and learning to evaluate and integrate research findings critically

M2

Empirical Methods in Early Childhood Research I

Learning to design empirical studies and to analyze data using cutting edge statistics

M14

Scientific Practice I

Learning good scientific practice and discussing research ethics

research colloquium

methods and skills

theory and application
